

Use the same UUIDs for your operating company and installations you have filled in the first pdf **B\_Base\_Data**.

## Base information of **operating company** and **installation**

UUID-Installation

Installation Name

UUID-Operator

Operator Name

Calculate the embedded emissions for your products in accordance to the guidance of the EU commission [LINK](#). We suggest a so called „bubble approach“, measuring and calculating the emissions for your whole installation based on a yearly schedule (**European calendar year 2022**). The emission factor can afterwards be used for all CN-Codes leaving the installation.

[LINK TO EU EXCEL](#) for emission calculation.

[LINK TO EU DEFAULT VALUES](#) for orientation.

[LINK TO DEFAULT VALUES](#) splitted by country.

## Emission data of the installation

### Direct Emissions

Type of applicable reporting methodology

Applicable reporting methodology  
(Only mandatory if type of applicable reporting methodology „other“ is chosen)

Specific (direct) embedded emissions  
[tCO<sub>2</sub>/t<sub>Product</sub>] (Example: 1.67 tCO<sub>2</sub>/t<sub>Product</sub>)

### Indirect Emissions

Source of electricity

Electricity consumed [MWh/t<sub>Product</sub>]  
(Example: 3.1 MWh/t<sub>Product</sub>)

### Goods covered by this emissions calculation

CN-Codes (8-digits) covered by this emissions calculation (split data with ” ; ”)

I hereby certify that, to the best of my knowledge, the provided information is true and accurate.
